JAYWON KOO

jk4541@columbia.edu ◇ [Homepage] ◇ +1-646-595-5360

RESEARCH INTERESTS

Emotion Detection, Multimodal AI, Spoken Language Processing, Natural Language Processing, Computer Vision

EDUCATION

Columbia University, New York, USA *September 2021 - December 2022*
M.S. in Computer Science - Natural Language Processing Track

Ewha Womans University, Seoul, Republic of Korea *March 2016 - August 2021*
B.S. in Computer Science and Engineering, *Magna Cum Laude*
B.S. in Self-Designed Major (Scranton Honors Program-Convergence of Science)

ACADEMIC PAPERS

- Hammad A. Ayyubi, Christopher Thomas, Lovish Chum, Rahul Lokesh, Yulei Niu, Xudong Lin, Long Chen, **Jaywon Koo**, Sounak Ray and Shih-Fu Chang. "Multimodal Event Graphs: Towards Event Centric Understanding of Multimodal World", arXiv:2206.07207, 2022 [Link]
- **Jaywon Koo** and Dongbo Min. "DAT-StereoNet: Domain gap Aware Translation Stereo Network", *(submitted)*
- **Jaywon Koo** and Dongbo Min. "Nighttime Stereo Matching using Domain Adaptation", Summer Annual Conference of IEIE, 2021
- Sunho Kim, Royoung Kim, Hee-Jo Nam, [and 42 others, including **Jaywon Koo**] "Organizing an in-class hackathon to correct PDF-to-text conversion errors of Genomics & Informatics 1.0.Genomics Inform", Genomics & Informatics, 2020 [Link]
- **Jaywon Koo** and Dongbo Min. "Stereo Matching in Night-time Scene using Stereo-consistency", Korea Software Congress, 2020

RESEARCH EXPERIENCE

Speech Lab, Columbia University January 2022 - Present
Graduate Research Assistant (Advisor: Prof. Julia Hirscheberg) *New York, USA*

- Work on DARPA funded project where we develop a multimodal model for detecting social norms, emotion, and communication failure.
- Built hierarchical multimodal fusion model (preparing for ICASSP 2023).
- Implemented speech emotion recognition model using HuBERT, Wav2Vec2.0 and Data2Vec.

DVMM Lab, Columbia University September 2021 - December 2021
Graduate Research Assistant (Advisor: Prof. Shih-Fu Chang) *New York, USA*

- Researched on multimodal event-event relations detection where we predicted relations of events in news video and newsletter.
- Participated in building event-event relationship dataset.
- Implemented two ways using ConceptNet and CLIP to utilize commonsense knowledge features in event-event relations detection (currently under review).

Computer Vision Lab, Ewha Womans University March 2019 - July 2021
Research Intern (Advisor: Prof. Dongbo Min) *Seoul, Republic of Korea*

- Analyzed novel problem of Image-to-Image Translation Network when domain gaps of source and target becomes large and invented a curriculum learning based model (currently under review).
- Developed a depth estimation network in low-light scene using stereo consistency and generated a Night time - Day time paired stereo dataset using Lightroom (2,000 pairs utilizing KITTI12/15, Citycsape, and DC datasets).
- Led a research on unsupervised stereo matching in low-light scene incorporating low light enhancement and denoising network, using pytorch.

Bioinformatics Lab, Ewha Womans University July 2020 - August 2020
Research Intern (Advisor: Prof. HyunSeok Park) *Seoul, Republic of Korea*

- Implemented Part of Speech (POS) tagging on biomedical data (GENIA, gni-corpus) by using BIOBERT and compared it with MLP, LSTM and BiLSTM (PyTorch).
- Participated in building Genomics & Informatics corpus.

PROJECTS

Korean Auto Speech Recognition Model September 2021 - December 2021
COMS6998: Fundamentals of Speech Recognition at Columbia University

- Implemented Korean auto speech recognition model based on Kaldi. Applied SentencePiece tokenization and compared two models where hidden Markov model reached 38.46% of Word Error Rate (WER), and TDNN approach resulted 16.56% of WER.

Hospital Guidance Robot February 2020
AAAI-20 Student Outreach Workshop

- Implemented a hospital guidance robot which finds the door automatically, navigates patients by voice and grabs object on the way. Used object recognition, and line tracking skills with Cozmo robot.

SORI (System with Omniwheel & Recognition Interface) October 2019 - November 2019

- Developed an AI assistant robot with omniwheels and Raspberry Pi which recognizes users and finds and carries ordered objects to other users. For face/object detection, utilized Single Shot Detection network, FaceNet, and MobileNet.
- Awarded Bronze Price in International Capstone Design Fair 2019 and second place in Ewha Engineering Capstone Design Contest

AWARDS AND HONORS

Naver Best Paper Award (among top-5 papers), Electronics and Information Engineers *July 2021*
Second Place, Graduation Project Contest, Ewha Womans University *Fall 2020*
Scholarship of Academic Excellence, Ewha Womans University *Fall 2020, Spring 2021*
Future Competent Scholarship, Ewha Womans University *Summer 2020*
Scranton Honors Program Scholarship, Ewha Womans University *Spring 2016, Fall 2018 - Spring 2020*

TECHNICAL SKILLS

Advanced Python, C, Java, Pytorch, Tensorflow, Keras, MySQL, Git, OpenCV, Sckit-learn
Moderate C++, Matlab, SPSS, LaTeX, OpenGL, Kaldi
Novice Swift
